

Lubchem Valve Flush

Lubchem Valve Flush is very effective in cleaning out hardened sealants and lubricants that contain solids and/or fillers in all types of valves. Lubchem Valve Flush does not contain acid, caustic, solvent, or solids. Lubchem Valve Flush is a synthetic oil based product that is bio- degradable, safe and non-hazardous. It is compatible with all valve lubricants and sealants.

Features

- Compatible with most valve lubricants and sealants
- Removes rust and corrosion
- Do not use in oxygen service
- Temperature range: 0° to 400°F

Application Procedure

Apply Lubchem Valve Flush with conventional lubricating equipment. Turn valve slowly and repeat the process until valve opens freely. After the valve is operable, lubricate with one of Lubchem's superior valve lubricants.
