

## Everlast 4B Gate Valve Lubricant Sealant

### **Description**

Everlast 4B is a high performance synthetic valve lubricant and sealant for gate valves. The advanced polymers and extreme pressure additives used in this product make it an excellent choice for use in high-pressure valves carrying natural gas, crude oil, condensate and ethylene. Everlast 4B contains unique solid lubricant additives that prevent metal to metal contact under extreme conditions of pressure and temperature.

### **Performance**

Everlast 4B is a specialized lubricant for close tolerance valves and will provide outstanding lubricity and high adhesion to polished metal surfaces. This grease provides corrosion protection and is water-resistant.

### **Physical Properties**

- Color - black
- Temperature range: -20°F to 450F
- Penetration, 25°C, wkd, 60 STR. 150 - 165
- Drop Point, Deg. °C none
- Oxidation Stability, (D-942), 10 max

### **Product Code - EV4B**
